

מכונת צבע אוטומטית לחגורות

SHUTTLE is an automatic patented dyeing machine used in belts and leather goods. It is able to dye perfectly the belt tips and edges or straps (also not straight) at the same operation, thanks to the patented mechanism of coloring.

Main features:

- Transport carried by bottom roller with upper free roller;
- Color distribution automatically on inking wheels;
- Automatic double variable speed for tips and edges;
- Lateral color container holder;
- Working width from 18/20 to 80/85 mm.

OPTIONAL: Stand device.
