DRYING TUNNEL E 3000 - E 3000 S

The drying tunnel **E 3000** is a suitable machine to dry the belts, shoulder straps and small leather pieces.

Main features:

- Noiselessness
- Heating and speed electronically controlled to suit any type of material and colour.
- Stream-line studied for obtain a constant flow direct on the product to dry along all the tunnel with saving energy.
- Silicone conveyor belt mounted on bearings.
- Drying tunnel easy to inspect fitted with an insulated plate cover.
- 2 heating elements of 2000 W each for uniform and continuous heating.
- Easy installation and positioning thanks to four self-locking wheels.

Absorption: 4200 Watt

Max temperature: 170° C

Productivity: 10/15 mt./min.

width mm.2850.
