

## מכונה אופקית לצביעת חגורות

### **HORIZONTAL BELT DYEING MACHINE**

*The 997 is a newly redesigned belt dyeing machine with a revolutionary working system.*

*Featuring a horizontally positioned working table, this machine allows considerable physical energy saving with a significant increase in productivity. It is suitable to dye belts and folded edges for luggage and leather goods in general (width from 10 mm to 60 mm) and also allows pre-dyeing of the belt tip. It is fitted with photocell that allows to proceed material rapidly.*

*The machine can be supplied whit or without stand.*

*Over having same characteristic of 997, it's feature of work in a double transport system, upper and lower, wich permits to dye short and small pieces also non rigid.*
