730/300 STAMPING MACHINE

The machine 730/300 has been projected to stamp in hot work, on straps, wallets, small leather pieces or synthetic leather material.

It has same technology of machine 730. Furthermore, the stamping time is adjustable from 0 to 10 seconds. The temperature can reach 150° C, adjustable with a thermo regulator.

the work plane is extractable with position-control by end material switch. The die holder size is 120 x 320 mm. The minimum thickness of the dies is 7 mm and it's easy to replace.

730/300 SN STAMPING MACHINE WITH RIBBON

730/300 SN enriches the range of Omac stamping machines. It is equipped with an automatic device which drags the colouring ribbon roller (gold, silver, etc.) up to maximum width of 140 mm. It has also a pneumatic device which extract the working table automatically.
