

# מכונת פיצול דגם FAV 430

## נתונים טכניים

Precision, high quality materials and ergonomic engineering combined to simplicity of use and working comfort, reduced maintenance servicing to limit unproductive stops and flexibility, ensuring ideal adjustment to the various working processes and to all materials characteristics to be processed, distinguishes the AV7 400NS and grant accurate splitting with extreme facility.

Fast and simple knife replacement with automatic positioning, easy sharpening and bevel symmetry control, allow the operator to achieve high productivity at a low production cost. The large range of application (shoe, leathersgoods, furnishings and general industry) allows the removal up to mm. 0.1 on any type of leather, man-made materials, etc..

### Features :

- \* Splitting thickness digital display
- \* Variable feeding speed electronically controlled
- \* Upper feed roll to split up to mm 0.6 minimum thickness
- \* Interchangeable upper feed roll and fixed presserfoot
- \* Reinforced bandknife with automatic positioning and frontward pressure
- \* Accurate knife sharpening
- \* Possibility to switch-off the machine without disconnecting the sharpening device and damaging the knife
- \* Optical bevel symmetry viewer
- \* Work light
- \* Protection safety bar

### Options :

- \* Incision splitting device (particularly suitable for belts, insole, toe puffs feeding, etc.)
- \* Rubber coated bottom feed roll
- \* Equipment to equalize and skive the edges of the belts
