

# מכונה מודולרית לסנדלרות

Through the combination of different machines of our production, it is possible to obtain compound work units which suit better all shoe-repairers requirements.

In general, these compound units are composed of:

- n. 1 Finishing machine selected among our models of K serie
- n. 1 Pneumatic pressing machine for soles and heels Model SCOUT or SCOUT/P with pressing-heels device
- n. 1 SMALL OVEN 1000W or 3000W
- n. 1 SHELF with 6 LASTS' JACK
- n. 1 SHELF with EXTRACTION
- n. 1 SHELF with SHOE WIDENING
- TOP NEON LAMPS

moreover it's possible to add SKIVING MACHINES, LOCKSTITCH SEWING MACHINE, ARM SEWING MACHINE and various accessories for shoe-repair in order to try to obtain the most complete work unit.

In particular, the compound work unit shown in the picture of this leaflet is composed of:

Pneumatic press Model SCOUT, Shelf with 6 lasts' jack, Small Oven 3000W, Shelf with extraction, Finishing machine Model K-22, Shelf with shoe-widening, Top neon lamps.
